

RESOLUTIONS TO ADVANCE EDUCATIONAL EQUITY

Below are student-centered resolutions you can introduce to encourage your party be a driving force for improving our schools. Then, you can help usher through your resolution to the finish line by becoming a delegate.

Resources for students most in need

I move the party support the equitable distribution of resources by guaranteeing schools that serve high-poverty students and students of color have access to necessary funding, facilities, and a committed workforce.

Increase teacher diversity

I move the party acknowledge that teachers of color improve learning for all students and are a statewide shortage area. The party should support helping schools recruit and retain teachers of color.

Make data-driven improvements

I move the party support providing teachers and families with meaningful student data so they know how students are doing, and schools and policymakers understand which school-level strategies are and are not working to help students grow.

Teacher licensure

I move the party allow school leaders hire from the widest, most diverse talent pools and bring on board high-quality teachers who can show their effectiveness in various ways.

School choice

I move the party empower Minnesota families by supporting their right to choose from an array of high-quality school options that best meet their children's needs.
