*Schools may be identified for comprehensive, targeted, or general support from the Minnesota Department of Education.

- Comprehensive support schools receive intensive interventions, and are selected because they are in the bottom 5% of Title 1 schools based on multiple indicators, or because they are a high school with any student group with a graduation rate below 67%.
- Targeted support schools receive support from their districts and limited state-level support. They are selected because they have a student group performing comparably to the bottom 5%, or because they are a Title 1 school with low measures of proficiency and academic progress.
- Support schools are eligible for basic professional development and networking, and are selected because they are Title 1 schools with low reading, math, or English Learner proficiency.
